

HV/LV Isolation Authority Competence Assessment

This is a two part assessment process comprising:

- Pre-Assessment Documentation Review
- Candidate Assessment

This is an intensive training session undertaken on site in order for candidates to demonstrate their intimate knowledge of the systems with which they will be working on.

Client documentation is collected and used together with the candidate's own questionnaire response in order to compile a suitable candidate training/assessment portfolio.

The assessment process normally takes 3 days on site but if the candidate fails to demonstrate the necessary competence, additional time may then be required to provide further coaching before re-assessment.
